

KABINA

KABINA

Live in harmony with nature

Say **Hello**
to KABINA

We invite you
to come in

Where
tradition
meets
innovation

Traditional Japanese craftsmanship meets cutting edge technology

Precision in Manufacturing

Computerized machining ensures every cut is the same with no room for error.

Innovative interlocking system

Traditional Japanese joinery techniques bequeathing beautiful construction. Held together by nothing more than tension and friction,, making it stronger and more durable than existing methods.

Patented Curved Compass A-Frame

KABINA's unique Compass A-frame technology allows for quick erection and precision in assembly. The curved roof aesthetically assimilates into your natural environment.

4hrs to Assemble & Disassemble

Each KABINA can be assembled and disassembled in under 4hrs due its innovative construction methods

We believe
there is always
a better way
and nature has
the answers

Relentless Sustainability & Constant Evolution

Renewable Plantations

KABINA only uses plantation timber sourced from renewable plantations.

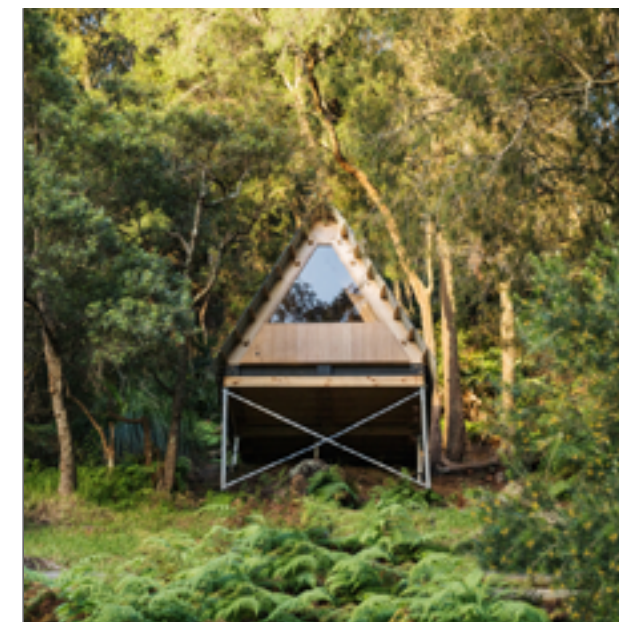

Minimal Waste

Our unique manufacturing process has 30% less waste than normal methods.

Minimal Resources

The compact nature of each KABINA allows us to minimize wasted space, resources and costs.

Low impact

Every KABINA we design and construct has minimal impact on the environment and abates our carbon footprint.

Reimagine
design to
embrace
circularity

Repurpose, Resell or Relocate

Lead Innovation

KABINA embrace's circularity setting new standards and moving the industry to a more sustainable future.

Circular model

The mobility and adaptability of each KABINA enables it to be cycled back into the circular economy to be repurposed, resold or relocated.

Smart Design

KABINA utilises innovative Interlocking joinery techniques making screws, fasteners and nails redundant. This allows to make products that are stronger, long-lasting, easy to assemble and disassemble and relocate back into the circular economy.

Stronger with time

KABINA's durable, timeless style is designed to strengthen with time due to the traditional interlocking joinery construction.

Live in
harmony
with nature

Find your KABINA

KABINA'S are designed to adapt to your environment and specifications.

The modular nature of each KABINA allows them to be modified to your preference and site requirements.

Our passionate team pride ourselves on long standing relationships and will go the extra mile to deliver your project.

Whether you want to customize your KABINA's size, add additional rooms, features or finishes our team of Architects and builders will guide you through the process to achieve your vision.

Construction & delivery

KABINA'S are built in our controlled facility, reducing time delays and material damage as well as minimizing site disturbance and noise pollution. Providing unprecedented quality control, our prefab KABINA'S use low embodied energy materials in the construction process.

Quick to complete, each KABINA is then transported flat packed to your site.

Our experienced and highly qualified team assemble each KABINA with precision, exceptional workmanship and unrivalled attention to detail in under 4 hours.

The mobility and adaptability of each KABINA also enables it to be cycled back into the circular economy for repurpose or resell.

We invite
you to
come in!
